截断句子

句子 是一个单词列表,列表中的单词之间用单个空格隔开,且不存在前导或尾随空格。每个单词仅由大小写英文字母组成(不含标点符号)。

• 例如, "Hello World"、"HELLO" 和 "hello world hello world" 都是句子。

给你一个句子 s 和一个整数 k ,请你将 s **截断** ,使截断后的句子仅含 **前** k 个单词。返回 **截 断** s 后得到的句子。

示例 1:

输入: s = "Hello how are you Contestant", k = 4

输出: "Hello how are you"

解释:

s 中的单词为 ["Hello", "how" "are", "you", "Contestant"]

前 4 个单词为 ["Hello", "how", "are", "you"]

因此,应当返回 "Hello how are you"

示例 2:

输入: s = "What is the solution to this problem", <math>k = 4

输出: "What is the solution"

解释:

s 中的单词为 ["What", "is" "the", "solution", "to", "this", "problem"]

前 4 个单词为 ["What", "is", "the", "solution"]

因此,应当返回 "What is the solution"

示例 3:

输入: s = "chopper is not a tanuki", k = 5

输出: "chopper is not a tanuki"
